Yes – and the answer was that we have not answered that question – so have asked OEX to reopen the control and assign it to OSWER to answer the NPL questions – however for the meeting on 10/15, seems we should have someone from OSWER on via phone to address the NPL issue – looping in Randy Deitz to see how we might work this out.

Thanks ng

Nancy, see R9 asking us to speak to NN's NPL support on Thursday. Did you get any feedback from Matt about a response to their letter?

**Subject: Meeting with NN on Oct 15**

Hi Martin,

Your staff has given us some very helpful slides about source controls that cover both the Upper Animas and Gold King Mine (see first attachment). Can you and/or David join via phone this Thursday at 10:30 am Mountain and 3 pm Mountain to go over these during our meeting with Navajo? We think President Begaye will only be participating in the morning session, which is slated for 30 min. The afternoon session with his staff is 1.5 hours, but the source controls part of that conversation is the first topic so you wont need to be on for more than 30 min. in the afternoon.

The call-in number is Nonresponsive Conference Code Can you please email a number where we can reach you to me and Sona Chilingaryan, copied above? I want to be able to reach you in case there are any issues with the call-in number.

We'll pass on a final version of the full presentation for Oct. 15 by tomorrow morning. I'm also attaching the agenda and the comments we received from Navajo on the Long Term Monitoring Plan. In these comments, Navajo reiterates their request for NPL listing. Like I mentioned to David last week, it would be good to be prepared to answer questions about where we're at with the listing process.

We're also trying to coordinate with David but it would be great to have you both on the phone to the extent that you can participate.

Thanks for collaborating with us on this,

Enrique

**Subject:** oct. 15 navajo meeting-- can you please call in during the morning as well?

Hi David!

There's two sessions on Gold King Mine with Navajo on Oct. 15. The first one is just 30 min. and is supposed to start at 10:30 Mountain. In addition to the afternoon session that starts at 3 Mountain and is 90 min., would you be able to log into the morning session? We initially thought we didn't need you, but Enrique now thinks it would be a good idea to discuss source controls in that 10:30 Mountain session since it's probably the only one President Begaye will be participating in. It would be great if you could go over the very helpful slides you gave us during both sessions (first attachment is just your slides—I'll send out the final version of the complete presentation either tonight or tomorrow morning that includes all the other slides as well).

The call in number is: Nonresponsive Conference Code Can you please give me a number to reach you at in case we're somehow disconnected?

I'm attaching the most recent version of the agenda and the comments we received from Navajo on Friday about the Long Term Monitoring Plan. They reiterate Navajo's request for NPL listing. Like Enrique mentioned last week, you'll probably get questions about this.

Enrique's also going to be touching base with Martin about whether he can join. Enrique will be doing the presentation and will prompt either you or Martin to speak up during the Source Control Parts of each session.

Thanks so much!

s.
